## Beskrivelse

With a mobile cooling module, you are assured of storing and transporting your products in all weather conditions. The temperature can be set between 2°C and 10°C, thus creating both a comfortable cooling temperature. The trailer has a GOVI Arktik 1600P cooling unit that ensures a long service life.

Furthermore, the trailer is built on a frame, so you can quickly and easily move the trailer around using a forklift where there is room for forks under the trailer.
